

AUTOSTACKER – AUTOMATIC PACK COLLATOR

JENTON
ariana

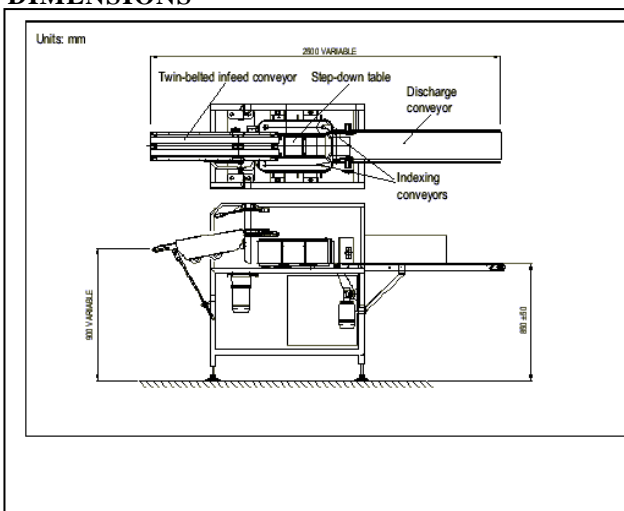

The **Jenton-Ariana** Pack Collator automatically stacks weighed and labelled packs up to a maximum height of 150mm. The system can be placed just prior to your manual or automatic packing operation, to form part of an automatic ‘end of line’ packaging system. The collator is capable of handling a variety of pack types, at speeds of up to 120 packs per minute. Main applications include **red meat, cheese, poultry, fish and fresh produce.**

The Pack Collator comprises:

- Twin belted infeed conveyor, to generate the necessary product spacing prior to collation.
- 2-off vertically mounted indexing conveyors where the collation is formed.
- Step-down-table to accept packs at different heights.
- Discharge conveyor, including pack restrictors to ensure stack

All belts are controlled via an inverter. The complete system uses PLC control. The pack collator can be dedicated to a particular pack size or is adjustable dependent on requirements. Constructed in stainless steel IP65 waterproof specification.

DIMENSIONS

SPECIFICATIONS

Automatic pack collator	
Packing speed	Up to 120 packs/min
Pack size range	Thickness: 5mm – 75mm Width: 80mm – 270mm Length: 90mm – 450mm
Protection	IP65
Machine weight	125kg
Power supply	AC 200-240v 50Hz 4A
Air supply	4bar 6 L/min (free air)
